

## EE600

## Differential Pressure Sensor

The EE600 is dedicated for reliable measurement of differential pressure in HVAC, building automation and filter monitoring applications. The multi-range device can be employed for air as well as all non-flammable and non-aggressive gases.

### Measurement Performance

The EE600 is available with full scale (FS) 1,000 Pa (4 inch Water Column) and 10,000 Pa (40 inch WC) and offers an outstanding accuracy of  $\pm 0.5\%$  FS. For the versions with analogue outputs, several measuring ranges are selectable with DIP-switches. The piezo-resistive, no flow-through pressure sensing element stands for outstanding long-term stability.

### Analogue and Digital Outputs

The measured data is available on the analogue voltage and current outputs or on the RS485 interface with Modbus RTU or BACnet MS/TP protocol.

### Functional and Robust

The IP65 / NEMA 4 enclosure minimizes installation costs. External mounting holes allow for installation with closed cover, the electronics are thus protected against construction site pollution.

### Configurable and Adjustable

The setup and adjustment can be easily performed with DIP-switches and push buttons on the electronics board (EE600 with analogue outputs) or with an optional adapter and the free EE-PCS configuration software (EE600 with RS485 interface). The setup includes pressure range, output signal, response time, display units and backlight. Beside differential pressure measurement, the EE600 can be set up for volume flow or air velocity measurement, as well as for filter monitoring or level indication. A zero and span point adjustment can be easily performed with push buttons on the electronics board.

## Features

### Accuracy $\pm 0.5\%$ FS

#### Multi-range (analogue outputs)

- » 0 ... 250 / 500 / 750 / 1000 Pa
- » 0 ... 2500 / 5000 / 7500 / 10000 Pa

### Service interface for configuration (RS485 version)

- » Measurands
  - » Differential pressure
  - » Volume flow (k-factor input)
  - » Air velocity (k-factor input)
- » Application setting
  - » Filter monitoring
  - » Level indicator

### Knockout for 1/2" conduit fitting (US)

### External mounting holes

- » Mounting with closed cover
- » Electronics protected against construction site pollution
- » Easy and fast mounting

### Test report according to DIN EN 10204-2.2

### User configurable and adjustable

- » Pressure range
- » Output signal
- » Response time
- » Display units and backlight
- » Zero and span point adjustment

### Graphic display with backlight

### Enclosure

- » IP65 / NEMA 4 protection class
- » Bayonet screws - open/closed with a 1/4 rotation

Connection			
Analogue outputs	spring terminals, max. 1.5 mm <sup>2</sup> (AWG16)		
RS485	screw terminals, max. 2.5 mm <sup>2</sup> (AWG14)		

1) Factory setup analogue outputs: measurement range 0...100 % FS; response time  $t_{90}$ : 50 ms; display unit: Pa; display backlight: on; analogue outputs: 0-10 V and 4-20 mA. Other ranges upon request.

2) Factory setup RS485: response time  $t_{90}$ : 500 ms; display unit: Pa; display backlight: on

3) Voltage and current output signals available simultaneously at the spring loaded terminals.

Housing material	Polycarbonate, UL94V-0 (with display UL94HB) approved
Protection class	IP65 / NEMA 4
Cable gland	M16 x 1.5
Electromagnetic compatibility	DIN EN 61326-1 DIN EN 61326-2-3
Humidity range	0...95 % RH (non condensing)
Temperature ranges	Operation: -20...60 °C (-4...140 °F) Storage: -40...70 °C (-40...158 °F)
