

Precision Ethylene Gas Monitor For Process Safety

DESCRIPTION

Bacharach's Multi-Zone delivers superior process gas monitoring with a MDL of 10 ppm for Ethylene gas, a fast sampling frequency, and an NDIR sensor that is immune to changes in temperature and humidity. The large LCD display and LED status indicators provide a system-wide overview at a glance.

The Multi-Zone Ethylene gas monitor ensures the correct concentration of Ethylene gas is utilized to obtain the greatest yield in the ripening process. A variety of communication interfaces are available, including Modbus, BACnet and LonWorks, allowing easy integration into BMS/BAS systems and remote monitoring solutions.

FEATURES

10 ppm Minimum Detectable Level

Monitors up to 16 zones

Infrared sensor technology

High performance sampling pump

Minimal maintenance and no calibration required

BENEFITS

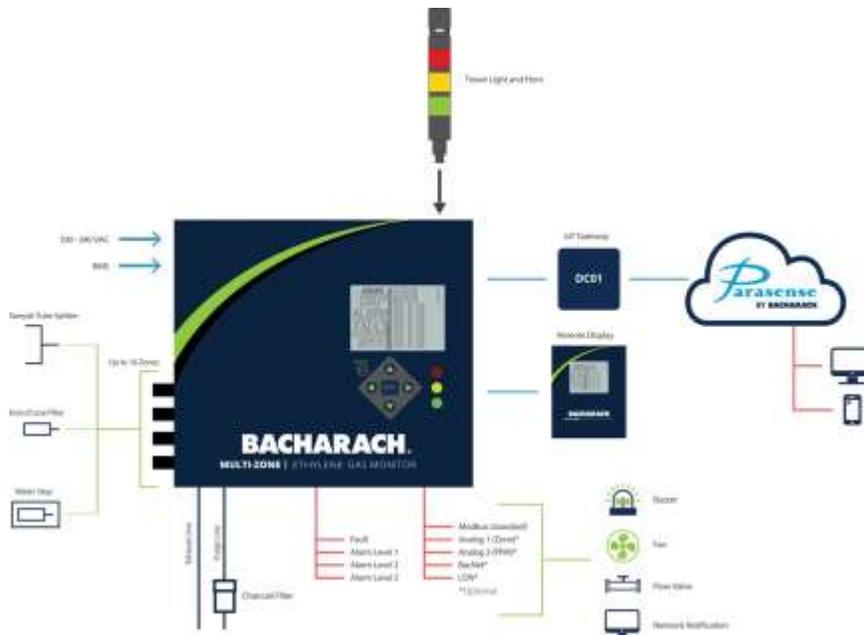

Ensures the correct concentration for maximum yield

Centralized monitoring for many ripening rooms

Accurate, precise measurement unaffected by other gases, temperature or humidity

Cycle times as low as 5 seconds for monitoring all zones with greater frequency

Low cost of ownership
